## About Company

**Magnate Design Centre**  
**Established - 1997**  
**More than 800 customers**

**Our experience** is 17 years of successful work at the Ukrainian market in the area of planning of complex solutions for office creation. High professionalism of our team allows us to understand modern trends of design of the office spaces and apply individual approach to each customer. By providing quality services, materials and ergonomic office furniture, we create comfortable conditions for effective work of our customer's personnel for the benefit and development of their businesses.

**Our mission** is to make offices with an atmosphere that motivates to create and achieve high results.

## Turn-key office

Comfortable office space is an important factor in growth of any company. However it is not that easy to create such an office that will serve your business with quality and will motivate your employees. It is not enough to buy good furniture and arrange it in random order. While it is possible to hire many companies so that each one does its small part, this would not guarantee a good overall result and requires a lot of time and resources for the control the process.

Magnate Design Centre Company can take care of this for you and completely organize the process for creation and implementation of your office.

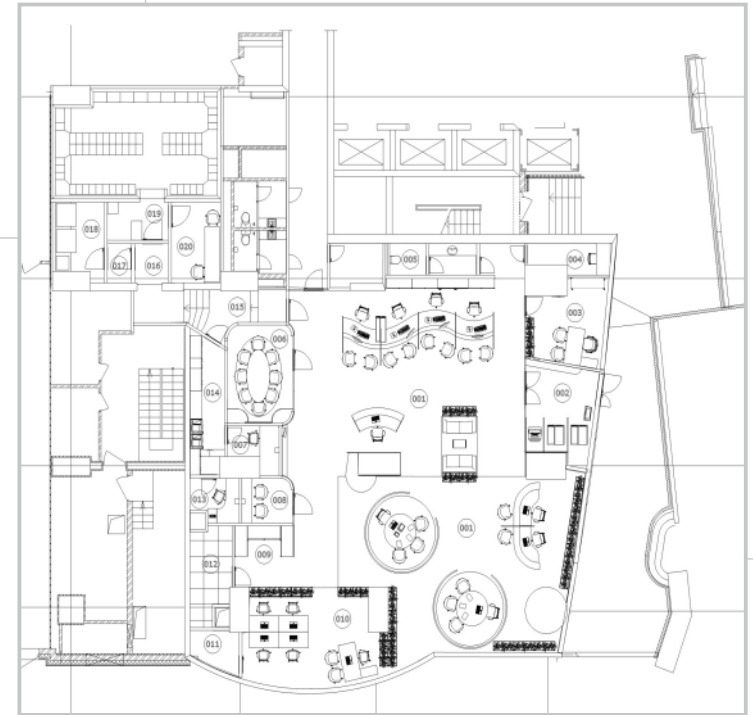

Turn-key office offer includes:

- Design of the space concept, project development
- Project management / general contracting
- Supply of the furniture and decoration materials
- Selection and provision of the smart office components, accessories and live plants
- Ongoing client support: advise on how to use, care instructions, replacement of damaged components and materials
- Warranty and after warranty service

## Design and architecting

The first and most important step in creation of a new office is project design. Correct approach to organizing the office space is a key element for successful future use. Smart office space design underscores status, promotes corporate symbols and creates good mood. Since office is live, changing and dynamic organism, our goal is to create such an office that helps being productive in a new environment and keeps being modern for many years. Concepts of “smart” office layouts and use of modern ergonomic furniture systems in the course of designing an office have proven their effectiveness. In such offices the employees are more productive, there is less employee turnover and they take significantly less sick leave. “Magnate Design Centre” - professionals, who boast extensive multi-year experience in planning and organizing office space, will offer you the most modern and best solutions in planning your office.

An important component of our company's approach is that we work together with client to develop solutions where desired design language and selected materials organically merge into a functional and inspiring whole.

# General Contracting

The success of any project depends on the quality of its implementation. For over 10 years, “*Magnate Design Centre*” perfects its professionalism by implementing interesting and complex projects. We constantly improve our skills, follow all new developments and create new non-standard solutions. Our biggest advantage - is use of modern methods of management and full transparency at all stages of project implementation.

## **General Contracting Service Includes:**

- Selection of sub-contractors for all parts of the project
- Coordination of sub-contractors
- Creation and control of overall project plan
- Technical and design oversight on site
- Provision of required materials and tools
- Testing and verification of installed equipment in the presence of client
- Commissioning of the finished project
